## World's Week

BY HAROLD L. WEIR

Modern wars are fought with swift airplanes, giant tanks, huge battleships, tremendous guns and vast bodies of highly trained troops. These are the immediate agencies that inflict death and destruction and the will of the aggressor upon peaceful nations.

But just as the tank or the airplane or the warship must have the combustion of fuel to give them activity, so must there be behind all this deadly array of death dealing devices some subtle spirit of malice and enmity to set them in motion.

In any conquest of a territorial enterprise there are the instruments of war—which are its body—and the will to war—which is its soul.

In the aggressive enterprise of Adolf Hitler, the will to war is engendered by a peculiar intellectual phenomenon which is known, for the purposes of convenience, as the Nazi mind.

Now the Nazi mind is not to be regarded as synonymous with the German mind. In point of fact, it is plainly identifiable in history long before the German race took organized form.

There was something of it in the Roman Empire, something of the same implacable ruthlessness, something of the same soulless destruction of individuality, something of the same stupid deification of the state as are seen today in the political monster spawned by evil men in Germany.

Perhaps it existed in some measure in some ancient city states that flourished when the ancestors of the Fascists were deriving nourishment from a wolf—or, more appropriately, from a jackal. The Nazi mind, so called, is the oldest thing in the world. It is the vilest selfishness of Cain, the mendacity of Ananias, the dishonesty of Machiavelli and anti-social fixation of Satan himself.

Hitler invented nothing. He merely gathered together all the legends and traditions of brutality, violence, hatred and crooked ambition that had ever plagued the world and combined them into one insane formula of government.

Of course it worked temporarily. Crime usually pays—for awhile. But to suppose that Hitler's "New Order", the supreme product of the Nazi mind, can be imposed upon the world permanently is to suppose that society can be finally conquered by criminals or that the course of evolution is working backward to transform us into apes or reptiles or amoebae again.

But if the Nazi mind is not altogether a product of this generation, neither is it the exclusive product of Germany. It has appeared in Italy where Mussolini—that tiger of Rome—has tried to graft it upon the Italians, with singular lack of success.

Mussolini built a synthetic Nazi state that possessed all the bestiality of the Roman Empire and none of its grandeur. The Roman Empire was destroyed by German barbarians. Mussolini had to ask the German barbarians to save his state.

Harold L. Weir

## LOCALS

Miss Lois Gilchrist is holidaying at Longview, Alta., this week.

Miss Daisy Robinson left Tuesday for a visit at Lacombe.

Allan Priest of Madden is now serving with the 2nd Calgary Tank Unit.

Miss J. Benedict, of the local school staff, left Monday to spend the holidays at her home in Olds.

Mr. H. McDonald entered hospital in Calgary last Saturday for further observation and treatment.

Mr. and Mrs. J. P. Metherell returned Saturday from a month's vacation at Vancouver and Victoria.

Born to Mr. and Mrs. Doug. Scholfield, of Midnapore, on June 20, a son, Steven Douglas Stewart.

Des. Fitzpatrick of the R.C.A.F., Calgary, spent Sunday here at the home of his uncle, H. R. Fitzpatrick, and Mrs. Fitzpatrick.

Mrs. S. R. Sweitzer a daughter of Miss Gladys Gilchrist left the beginning of the week to spend a holiday at Maple Creek, Sask.

The Dominion Day dance sponsored by the Board of Trade was well attended and a splendid time is reported.

Miss Kathleen Fitzpatrick, who is attending secretarial school in Calgary, spent a few days at her home here this week.

After attending school in Victoria for the past year, Ruby Lee returned Sunday to spend the holidays with her parents, Mr. and Mrs. Chas. Mieland.

Raymond Patmore tells us that his watch went through the family wash last week when he had left it in his pants pocket, and it came out still running. That's one for Riplew.

Mr. and Mrs. H. J. Wall announce the engagement of their second daughter, Esther Bertha, to Mr. Burton R. Blough of Crossfield, the marriage to take place in July. — Didsbury Pioneer

## Dog Pound

(Too late for last week)

The local Ladies' Aid held a strawberry festival and in spite of a hail storm in the afternoon, served 9 cases of strawberries along with cake, etc. Net returns were in the neighborhood of \$36.00.

A postponed ball game between Dog Pound and Water Valley was played on Friday evening, June 20, which resulted in a 4 all tie. The diamond was quite wet and errors were numerous.

Several local feeders sold their cattle last week. They were weighed through Mr. Harrison's yards at Crossfield.

Some light frost was reported in the district on June 19th. Damage to beans and potatoes was noticed.

June 30. — The Dog Pound school had a picnic at Satchwell Bros ranch last Saturday. Everyone present had a good time. It is a natural spot for a picnic, with fine big shade trees and a level meadow for the sports.

A vote of thanks was tendered Mrs. Satchwell for the trouble she had taken to see that everyone had a good time.

The local ball team beat Cremona 18 to 9 at Cremona on Sunday. This was Dog Pound's last league game. The first playoff game will be next Sunday, time and place not settled as the other three teams have postponed games to play to decide standing.

Mr. R. E. McArthur still has some steers on feed. He has not decided if they will go through Mr. Harrison's yards at Crossfield or not.

The Midland and Pacific Grain Company's agent reports that the 1941 permit books are now available.

Part of Mr. Hoffman's farm was missing last week — he found it in the coulee where the rain had washed it.

## LOCALS

Mrs. Harve McCool and baby daughter arrived home from Calgary on Sunday.

Mr. and Mrs. W. L. Walroth, accompanied by their sons, Chester and Leslie, returned Tuesday from a motor trip covering the circle tour through Banff, Jasper, Edmonton and Sylvan Lake, and report a wonderful trip.

Complimentary to Miss Gladys McDonald, teacher of the Floral school, a number of residents of the district gathered at Hall's coulee Monday evening for a weiner roast. Miss McDonald was presented with a vanity set as a holiday gift.

The Chronicle has received a letter from E. H. Wylie, who is serving in a transport company overseas, stating that he is receiving the paper and enjoys reading the local news. His duties take him through England, Scotland and Wales and he says he finds the people very friendly and the countryside beautiful.

Rev. H. Ellison left Wednesday morning for Trail Ranger Camp at Meridian Beach, Sylvan Lake. He was accompanied by Joe Ellison, who will act as a leader, and Robert McCaskill, Eldon Stafford, Roy Sackett, Gordon Reeves, Ken, and Reg. Belshaw. Mr. W. W. Stafford assisted in transporting the boys to the Camp.

Eleven cars left the United Church at two o'clock Monday afternoon, filled with members of the Sunday School, teachers and friends, bound for St. George's Island on their annual picnic. Races and games, and inspection of the zoo, filled the afternoon and a bounteous picnic supper with lots of ice cream and lemonade completed the pleasant outing.

Mrs. Ellison, the superintendent, expresses her appreciation to those who provided cars to make this trip possible, or helped in any way towards its success.

## WEDDINGS

### KINSEY — BILLINGS

A pretty wedding was solemnized at the home of Mrs. Alice Kinsey at five o'clock Sunday afternoon, June 29, when Miss Gladys Billings and Mr. Ernie Kinsey were united in marriage. Rev. H. V. Ellison officiated.

The bride was lovely in a dress of white sheer and carried a bouquet of pink roses. Miss Irene Walker, the bridesmaid, wore grey and carried pink carnations.

Mr. Fred Heywood acted as best man.

Following the ceremony, a buffet luncheon was served to about twenty guests, after which the happy couple left amid a shower of rice and confetti to spend a brief honeymoon at Banff. The bride wore a dusky rose and navy ensemble.

On their return, Mr. and Mrs. Kinsey will reside in Crossfield.

### KENT — GORDON

In a setting of pastel toned gladioli, banked by ferns and palms, a pretty wedding was solemnized at the home of Mr. David Jones in Calgary at 7:30 o'clock on Thursday evening, June 19, when Stella May, eldest daughter of Mr. and Mrs. A. W. Gordon of Crossfield, was united in marriage with Sergeant Alan Gordon Kent, C.M.S.C. of Calgary headquarters staff, only son of Mr. and Mrs. R. H. Kent of Medicine Hat, Alberta. Rev. E. Melville Aitken officiated.

To the strains of the Bridal Chorus from Lohengrin, played by Frank McDonald, the bride entered the room on the arm of her father who gave her in marriage. She wore a silk lace gown of shades of roses. Her corsage was of Rapture roses and white sweetpeas and in her hair she wore Sweetheart roses.

Miss Alma Gordon attended her sister, wearing an afternoon frock of robin's egg blue crepe with a corsage of Talisman roses.

Sergeant George Leslie, C.M.S.C. was the best man.

The bride's mother chose for the occasion a dress of dusky rose sheer with a corsage of Talisman roses. The bridegroom's mother chose navy blue crepe and her corsage was of Johanna Hill roses.

Following the ceremony a reception was held for thirty-five guests. The three-tiered wedding cake, decorated by a tiny silver vase of pink rosebuds, formed the centerpiece for the bride's table. Vases of rosebuds and pale pink tapers completed the decorations. Mrs. P. H. Fleming of Crossfield and Mrs. J. A. Mather presided. Rev. E. Melville Aitken proposed the toast to the bride.

Mr. and Mrs. Kent will reside in Calgary.

## "A.A." — Bane of Nazi Bombers

Gunnery men an A.A.-anti-aircraft-weapon in the British-held fort at Tobruk, which has been under siege since Axis troops swept east from Bengasi and penetrated to Sollum, Egypt, last month. To date the anti-aircraft forces have

quite proven their value in the war. Monday the Italian High Command reported a new Axis attack on the port at Tobruk, claiming that a British warship had been damaged and four steamers sunk.

Designed to encourage oil drilling in Alberta, new regulations have been brought into effect, it was announced this week. The new orders will have the effect of easing conditions in regard to depreciation and depletion of wells, and geological, survey and exploration costs may be written off in the year in which they are incurred. Rates of depreciation and depletion which will henceforth allowable are cited in the new order.

### POST OFFICE ADDRESS NEEDED IN CANADA

The incomplete addressing of mail intended for soldiers at training centres in Canada is the cause of numerous delays in delivery. Hon. Wm. P. Mulock, K.C., Postmaster General, to obviate this situation, again requests the full co-operation of the public in writing out in full the correct and complete address on all military mail.

It is essential that the Post Office place-name should always be included in the addresses of mail posted to soldiers still in Canada because their mail is handled by civil post offices and not by the Army Postal Service. The omission of the "name of place where the soldier is located" has resulted in many such letters and parcels being forwarded to the Base Post Office, where it is found that the Units named in the address are still in Canada. The resultant delay thus caused, and the extra work thrown upon the Canadian Postal Corps in locating the addressees of this mail would be entirely eliminated if the rules of correct addressing are observed.

Mail for delivery in Canada should be addressed with the usual complete particulars: Regimental No., Rank and Name, Name and details of Unit (i.e. Company or Section, Battery Holding Unit, etc.), Name of Regiment or branch of the service, in full, and the NAME OF THE POST OFFICE where the unit is located.

Mail for delivery Overseas should be addressed in the same manner but replace the name of the Post Office with the words "Canadian Army Overseas".

All letters should be fully prepaid and a return address should be given in the upper left-hand corner.

### Low Freight Rates

Although Canadian railways buy their supplies at an average of twenty five per cent greater than the cost to United States lines, Canada's average per ton mile freight rate is lower than in any country in the world except Japan, where employees are paid a few cents per day, stated R. C. Vaughan, Vice President, Purchasing, Stores and Steamships, Canadian National Railways, who was the guest speaker at the recent dinner gathering of the Medical and Surgical section of the Association of American Railways in Montreal.

Dr. K. W. Neathy  
Director, Agricultural Department  
North-West Line Elevator Association

It is a noteworthy fact that even in the weediest districts, some farms are clean. On May 29, I took a short drive through a district north of Winnipeg. Very heavy infestations of sow thistle, blue lettuce, lady's purse, quack grass, sinkweed and a variety of annuals were prominent. However, there were two farms on which scarcely a weed was to be found, and the owners or operators were not just lucky.

If a farm is clean, weed-free seed must have been used, and wise tillage practices followed. Wise tillage practices include timely and thorough fall and spring cultivation and careful summerfallowing.

At this time of year weeds grow very rapidly. Delayed operations often lead to plowing under a new crop of weed seeds—a dangerous form of insanity. If the summerfallow is to be plowed, it should either be plowed early or surface-tilled in May and early June. "Flowless" fallows must be tilled often enough to prevent annual weeds from setting seed.

There are many farms in the prairie provinces so infested with perennial weeds that eradication would cost more than the land is now worth. If we are not careful, there will be many more.

Weeds delivered to any grain buyer of the line elevator companies sponsoring this Agricultural Department will be forwarded to us for identification. Specimens may also be sent to Dominion Experimental Stations or Provincial Departments of Agriculture.

### NEW TOOL SPEEDS PRODUCTION

A tricky problem of aircraft production has been solved by a new portable tool weighing only 2 lbs.

On all modern aircraft, thousands of nut plates are used for securing cowings, fairing strips, inspection panels, instruments, and control runs. Formerly, for every one of these nut plates, three rivet holes had to be marked off and drilled separately, a slow and tedious business.

To-day in one swift and simple operation, the new portable tool drills two holes accurately spaced and centred.

This novel two-spindle portable drill, designed in Britain, is powered by the "Mighty Atom" pneumatic motor, many thousands of which are in use in the aircraft factories of Britain, the Empire countries, and the United States.

## Summer Vacations In The Canadian Rockies

Banff, where the movie stars play; Lake Louise, which is numbered among the ten most beautiful views in the world, and Emerald Lake, Yoho Valley, Moraine Lake, Lake O'Hara, Lake Wapiti and those other comfortable lodges in the Canadian Rockies have this year made attractive plans to entertain record numbers of American and Canadian holiday-seekers.

During the three-month season, early June to early September, the famous southern section of the Canadian Rockies will hold the stage as Canada's most outstanding holiday ground. A mile above sea level, these resorts offer the ultimate in vacation pleasure. Banff Springs Hotel has a golf course which stands among the foremost on the continent; there are splen-

did swimming pools at Banff and Lake Louise. From all the resorts there are unlimited possibilities for pleasure trips by motor, horse or on foot. Wild animals roam freely through the great national park and there is a profusion of gay alpine flowers to provide a lovely foreground for the scenic grandeur of the eternal, snow-covered peaks. Dancing, swimming, boating, fishing, camera hunting and tennis are among the regular recreation possibilities. Special events on the entertainment calendar this year are the Stampede, or rodeo, at nearby Calgary, July 7-12; Indian Days at Banff, July 17-20; Alpine Club Camp at Glacier, July 20-August 3; annual outing of the Trail Riders of the Canadian Rockies, July 26-29; annual outing of the Sky-Line Trail Hikers, August 1-

4; Banff Golf Week, August 24-30, and Banff School of Fine Arts, August 1-30.

The holiday magic in those famous resort names will be made more familiar throughout the North American Continent this summer. Americans have always made up the majority of visitors to this lovely playground and early-season reservations indicate that they will return again in increased numbers. A series of bargain fares and special 21-day excursions to Banff, Lake Louise and other Rocky Mountain resorts, over Canadian Pacific Railway lines, will this year make it possible for many Eastern Canadians to spend inexpensive vacations in the Canadian Rockies, while Western Canadians will in their usual large number spend their holidays in the Rockies.

**GROWING PEPPERMINT  
IN ONTARIO**

By S. Leslie Emile

Two striking examples of resourcefulness were encountered on farms in south-western Ontario. A farmer of Polish origin is growing 30 acres of peppermint and has already installed equipment for the

distillation of the oil. Next year the crop will extend to 85 acres, and a second still will be constructed. His father was a veterinary surgeon who used to grow and distill peppermint for his own medicines. That's how the son got the notion. The crop, for which a fertilizer was applied, was nicely up at the beginning of May. Four crops will be taken before the field is plowed again.

The other story is of a man whose farm grew bumper crops of alfalfa and corn prior to 1929 and had been tile-drained at great cost. Then Lake St. Clair overflowed in a tremendous flood which submerged the farm land. Efforts to reclaim the land from the waters proved unavailing, so this man decided it was futile to buck nature and he would co-operate with her. The once fertile farm is now a swamp, growing bullrushes instead of alfalfa, but stocked with muskrats and wild ducks. The revenue from this back to nature area is represented by sales of pelts and the fees which hunters pay for the privilege of shooting at wildfowl. Thus was disaster turned to profit.

Besides the swamp area of 1200 acres, there are others that escaped the flood and are still producing wheat, corn, alfalfa and onions. Here about 25 tons of fertilizer are used annually, which gives some idea of the extent of the regular farming operations.

**ARE YOU A WAR SAVER?**

**WARTIME BRITAIN  
IN BETTER HEALTH**

The United States are sending a committee of medical men to Britain to try and find out why the people have come through the winter's "blitz" with better health than in the years of peace.

Medical men generally are completely baffled by the nation's fitness. They feared that, after nights of crowding in air-raid shelters and exposure to all kinds of weather on A.R.P. and fire-watching, epidemics would sweep the country like a prairie fire.

In fact there have been fewer cases of scarlet fever, diphtheria, pneumonia, and typhoid fever, and only half the number of deaths from influenza. Whooping cough and meningitis have alone been rather more prevalent than usual.

Britain's own doctors offer various explanations of the mystery among them the dispersal of densely populated areas, the improved system of health supervision, the spread of education in preventive measures, fewer people at "the pictures" and in other public places.

All, however are agreed that the busy, hazardous life led by the 45,000,000 people leaves them neither the time nor the inclination to brood over minor ailments. The war has taken them "out of themselves."

**The World  
of Wheat**

By H. G. L. Strange

When it was recently proposed to place a processing tax on Canadian wheat used in Canada, in order to increase the price of wheat a few cents a bushel to our farmers, some people took exception to the plan on the grounds that if the price of wheat were to be raised, then the price of bread would increase, and, it was maintained, this would inflict a severe hardship upon industrial workers and others in Canada.

It is most important, I for one believe, for those who hold such views to realize that the price of wheat today is far below the cost of production, and is entirely out of line with industrial wages, and that as soon as foreign markets are restored and surpluses reduced then the price of wheat will naturally rise to more reasonable level.

Even a considerable rise in the price of wheat, however, should have but little effect upon the price of a loaf of bread. A pound of wheat makes a pound of bread, so that an increase of, say 30 cents a bushel in wheat (1-2 a cent a pound), should not increase the price of bread by much more than about one cent a pound and such a slight increase is, of course, practically negligible.

Following factors have tended to raise price: Harvesting of U.S. southwest wheat area delayed by widespread rains. Spain's 1941 wheat crop estimate practically unchanged from low yield of 1940. Unfavorable growing conditions continue over most of Europe. Japanese 1940-41 wheat crop estimated at 58 million bushels compared with 66 million bushels for 1940.

Following factors have tended to lower price: North Africa is expected to have a wheat crop of about 70 million bushels providing a surplus of 16 to 19 million bushels. Recent rains in Australia have helped to alleviate drought conditions. Widespread rains have fallen recently over U.S. and Canadian spring wheat areas.

**Camp Commandant and Successor**

Ftl. Lt. Maurice Janin

Ftl. Lt. Fergus Grant

Promoted from flying officer, Ftl. Lt. Maurice Janin who was previously camp commandant at No. 3 Training Command Headquarters here, has been posted to the Training Flying branch. He has been succeeded as camp commandant by Ftl. Lt. Fergus Grant, former well-known Montreal newspaperman, who joined the R.C.A.F. as a press liaison officer but has more recently been serving as Auxiliary Services Officer at the Regina Headquarters of No. 4 Training Command. Ftl. Lt. Janin, member of a Montreal family, wins his promotion 14 months after his first appointment to the air force. After taking a course in administration at Trenton, he was posted to the Recruiting Centre at Montreal. Later he became personal assistant to the Air Officer Commanding until his appointment as Camp Commandant.

This map shows the main points raided heavily by British bombers, the city of Hamburg being subjected to the worst smashing from the air since the war started. Other cities bombed are marked.

**Just a Daily Chore**

The significant work the women in Britain are doing in the war effort has gained the admiration of all the Empire. They're willing, co-operative and go about their tasks with a cheerfulness that is most inspiring. Our picture shows members of a women's Labor Corps filling sand-bags near London. They answered a call for volunteer demolition and salvage workers.

### NO TEACHER SHORTAGE

Fears for a shortage of teachers in Alberta during the coming year have now been allayed, and according to Department of Education officials, unless some unforeseen circumstance arises, no school will remain closed because of teacher lack. The department invited former teachers to go to summer school this year with a view to returning to the profession and some 65 have expressed their willingness to do so. This number is considered sufficient to offset any shortage brought about by enlistments and resignations.

### Buy War Savings Certificates

America's ace color photographer, Ivan Dmitri, reportedly enjoyed the "shootingest" time in Jasper, where he led a caravan of photographers recently. Presence of this party of tourists is considered a major asset by provincial tourists officials, since each person is an enthusiastic photographer, all are competitors in a picture taking contest, and all will return to their homes with pictorial advertisements of Alberta's major tourist attractions—the mountain playgrounds.

### One Billion Tons Of Coal In Cape Breton

Among the coal resources of Canada, those on the island of Cape Breton, Nova Scotia, are among the most important, according to the Natural Resources Department, Canadian National Railways. These coal fields have a commercially accessible reserve of one billion tons which, with deposits in other provinces, assures Canada of a plentiful supply for many years to come. With the important place that chemistry now occupies in practically every field of human endeavor, and the growing use of internal combustion motor as a source of power, Canada's coal deposits are taking on an increasing value. Coal is the source of many important chemicals and it also can be converted into oil and gasoline.

### MAGIC RAY

Unique records are being made of incidents in the air war on Britain thanks to a device perfected by British inventors. Even at midnight it is now possible, without the use of a flash, to take photographs as sharp as any on a sunny day. It is done by using, instead of the usual flash bulbs, special bulbs coated with infrared filter coatings which turn the dazzling magnesium flash into a dim red momentary glow, invisible to the eye. The invention, regarded by photographers as one of the biggest advances since the invention of the dry plate, has revolutionized night photography. It has further applications for aerial and land survey work, spectrography, clinical photography and psychical research.

Suggesting that Canada might well follow the example set by England and other countries in fighting the increase of heart disease among children, the Health League of Canada has released details of a campaign which is planned in San Francisco area. A survey of heart disease in children is now being carried out in three counties included in the area, it was stated.

The program also provides for diagnosis and treatment of all children acutely ill; medical, hospital and after care for children of parents unable to pay; medical, nursing and social service work for all children included in the program; special service in cases of rheumatic fever, and provision of educational opportunities for patients capable of studying.

Children with histories of rheumatism and rheumatic fever will receive special attention.

### Worm your PIGS with — DARLEY'S

### ONIONS WELCOMED IN GLASGOW

That anyone anywhere should go into raptures over an onion may sound strange to those in Canada, who are familiar with the broad expanses of muck and other soils devoted to the growth of this crop, or to the housewife who buys these tasty bulbs at the corner store. In Britain where emphasis is now placed on the production of crops which yield most food per acre, the onion has been relegated to a position of lesser importance in the national economy. Besides, the crop on the restricted areas was a failure last year, and the onion has become as rare as the banana over there.

A letter from a home in Glasgow acknowledges receipt of a gift of onions from Ontario. They had to be shared with others, some going to relatives in Aberdeen, while the man of the house took one choice specimen to the office and showed members of the staff what an onion looks and smells like! Saying it with onions sounds like something new.

### Business and Professional
